Major Disaster → involves a big chunk to all of the ward. Examples might be earthquake, tornado, town of Greybull flooding, major chemical accident down in Greybull. It will likely involve some of the following work crews, evacuation, feeding and housing people in place, creating a communication system. This could also include a major disaster in a neighboring community where we needed to handle medical, housing, food and water for large numbers of people.

Staging areas for wor	rk crews, evacuati	ion and or loss of co	ommunication?	2 1 in each end	of town and
each direction out of	town. Parking af	fects some of the cl	noices. In town	n the Bishop	and
The old grade school lot for now provides a bunch of parking near the bishop's and the bunch of LDS					
homes near	possible parking t	here. South of tow	n the church. `	West of town	East
of town	and	We should know e	xact location a	t each staging a	rea where a
note can be posted in the event of loss of communications. So for example it might be on the north					
door of the church. In the event of loss of communications these areas will be vital for gathering work					
crews and information. The difficulty will be consolidating the information. Likely we will fall back					
to using just a couple of them to reduce these problems. But until we know what the problem given the					
spread out nature of our ward we should have all of these known.					

Bishopric

The Bishop(rics) first task is establishing the leadership is functioning and moving in the right direction and then begin overall coordinating. In this type of emergency likely there will be a community command and control center. The bishop likely belongs there once it is established. With him should be either the ward clerk or executive secretary to serve as communications and gopher so the bishop can actively stay involved in command and control. Till that is established use the staging areas as operating bases? Likely the church will be needed for something so another member of the bishopric or remaining ward clerk or secretary belongs here to have keys to as much of the building as possible and the authority to use the building as needed. Likely there will be a work site close to the problem and another member of the bishopric belongs here to organize work crews. That leaves a bishopric member or ward clerk or executive secretary free. They will float to the needed location. That might be organizing another work crew at a different staging area, being the gopher for the main work crew person or doing something out at the church like organizing evacuation or traveling around building and maintaining a list of members found and okay. The bishopric primary responsibility in this leadership, establishing and maintaining communications, maintaining list of ward members safe and those affected or unknown, and calling in supplies if needed.

High Priests

The first task assuming communications are operational is a quick check in with the bishop by the HP group leader. The rest of the HP presidency should check with the group leader as soon a possible or he with them. If they can not reach him one of them should assume temporary leadership and begin the other steps. The second if possible is a quick check with the EQ and RS leadership. The next task is checking on the welfare of all the families ward by HT and VT. HP, EQ and RS leadership together should coordinate this and build the lists. This should work outward through the HT and VT. The list should include if all family members are accounted for and if not who is missing, Who reported, if there are any emergency needs and any assignments made. Assignments might be simply to go the staging area, shelter in place for further word, to help or check on some family. The progress on this should be reported to the Bishopric at regular intervals along with anything they need to know.

The first task assuming communications are operational is a quick check in with the bishop by the EQ President. The rest of the EQ presidency should check with the president as soon a possible or he with them. If they can not reach him one of them should assume temporary leadership and begin the other steps. The second if possible is a quick check with the HP and RS leadership. The next task is checking on the welfare of all the families ward by HT and VT. HP, EQ and RS leadership together should coordinate this and build the lists. This should work outward through the HT and VT. The list should include if all family members are accounted for and if not who is missing, Who reported, if there are any emergency needs and any assignments made. Assignments might be simply to go the staging area, shelter in place for further word, to help or check on some family. The progress on this should be reported to the Bishopric at regular intervals along with anything they need to know.

Relief Society

The first task assuming communications are operational is a quick check in with the bishop by the RS president. The rest of the RS presidency should check with the president as soon a possible or she with them. If they can not reach her one of them should assume temporary leadership and begin the other steps. The second if possible is a quick check with the EQ and HP leadership. The next task is checking on the welfare of all the families ward by HT and VT. HP, EQ and RS leadership together should coordinate this and build the lists. This should work outward through the HT and VT. The list should include if all family members are accounted for and if not who is missing, Who reported, if there are any emergency needs and any assignments made. Assignments might be simply to go the staging area, shelter in place for further word, to help or check on some family or other. The progress on this should be reported to the Bishopric at regular intervals along with anything they need to know.

Sunday School

The Presidency should contact each other where possible and the HP group leader for assignment. Likely their task in the short term will be beginning getting work crews set up and seeing about the temporal needs while the other organizations complete the check on the welfare of the ward. From there as needed either filling in gaps in leadership or joining assigned work crews as priesthood leadership frees up and takes over.

Ward Mission Leader

Check on the welfare of the missionaries if possible. Report results to HP group leader. Then report to the their appropriate priesthood leader for assignment.

Young Women

The YW presidency should check on each other where possible. Then check with the RS leadership for assignments. Failing that the HP leadership. Failing that check with EQ presidency and Failing that check with the bishop. Likely a member of the presidency and the secretary should join the effort of checking on the welfare of ward. This will allow the presidency to check on the youth at the same time. The rest of the presidency will likely be instructed to join the SS presidency to begin looking out for the temporal needs of the ward getting work crews assigned and other tasks. The youth should mostly be working with their parents and YW leaders should work to be sure the youth are taken care of as this is done.

Young Men

The YM presidency should check on each other where possible. Then check with the HP leadership for assignments. Failing that check with EQ presidency and Failing that check with the bishop. Likely a member of the presidency and the secretary should join the effort of checking on the welfare of ward. This will allow the presidency to check on the youth at the same time. The rest of the

presidency will likely be instructed to join the SS presidency to begin looking out for the temporal needs of the ward getting work crews assigned and other tasks. The youth should mostly be working with their parents and YM leaders should work to be sure the youth are taken care of as this is done.

Primary

The presidency should check on each other where possible. Then report to HP group leadership. Likely this means The Primary's job will be to see to the welfare of those under 12 and work to see they are taken care of while the parents work on the problems and assignments at hand. This may mean groups of kids at various homes or this might mean all the kids gathered to the church or other options.

Local disaster → involves an area in the community. Examples might be localized flooding, tornado, fire, chemical spill, terrorist incident or the bus accident. Loss of communications is unlikely in this event but still possible. Maybe use the staging area closest the problem as initial communication point and where to expect to find a bishopric member? It rides were done from there it would prevent a parking traffic jam near the problem as work crews are brought in.

Bishopric

In this type of emergency likely the bishopric will be needed in 2 places for this type of emergency. At or near the site of the emergency and out at the church. The church is a likely staging area for the hospital and temporary shelter so at least one bishopric member should be there. Another bishopric member either on the scene or at the nearest staging area.

High Priests

The first task assuming communications are operational is a quick check in with the bishop by the HP group leader. The rest of the HP presidency should check with the group leader as soon a possible or he with them. If they can not reach him one of them should assume temporary leadership and begin the other steps. The second if possible is a quick check with the EQ and RS leadership. This may mean groups of kids at various homes or this might mean all the kids gathered to the church or other options.

Small disaster → Involves no more than a couple homes or families. Homes burning down or flooding would be possible examples here.

Bishopric involvement here is as needed but should mostly fall on the auxiliaries. Coordinating the auxiliaries and possible help through fast offering funds should be the bishoprics responsibility here.

Other Auxiliaries: this type of emergency the primary leadership and responsibility should fall to the High Priests, Elders Quorum and Relief society with other auxiliaries called on as needed. With all leadership reporting back to the bishopric with actions taken and needs.
